These results are generated on the basis of K-fold cross-validation with 7 number of splits. These tables represent the *'minimum'*, *'median'*, *'maximum'* accuracies that the model achieved with the following dataset and the corresponding *'variance'* and *'standard deviation'*.

This is a box_plot for all the algorithms showing *'minimum'*, *'maximum'*, *'median'*, *'1st quartile'*, *'3rd quartile'* for the performance of the models.
